

SLINGSHOT TEMPLATE

FOR MULTIPLEX (BIRCH PLYWOOD) BOARD CUT SLINGSHOTS

Minimum safe recommended board thickness: **19mm**

DISCLAIMER: In no event shall I be liable for any direct, indirect, punitive, incidental, special consequential damages, to property or life, whatsoever arising out of or connected with the use or misuse of the slingshot design information presented herein and in the video posted on youtube.com.

Always ensure that you comply with local laws, and shoot safely

Useful info - an example of a **European Baltic birch plywood manufacturer** and supplier:

<http://www.metsawood.com/products/plywood/birch/pages/default.aspx>

- Download the file and print the template, then cut it out with scissors.
- Stick the paper template on 2 mm cardboard, cut it out, and sketch it on the board.
- **The upper hole** for the long (ring) finger is **optional**, but highly recommended.
- watch the detailed **video tutorial** available at YouTube at <http://youtu.be/pV1I99TKE38>
